Am-----/ G-----/ C-----/ G/B-----

And you're still, you don't quite like your company tonight

And you feel , not quite how you used to feel tonight

And you try to feel the shudder but it takes a while tonight

And you know you know you can't even fake a smile tonight

And you dream, about the way things used to seem

About a touch that turned your world around

About a moment and a face,

But just go on and take a safe ride, a safe ride

And you hear, the echo of my voice inside your mind tonight

Does its love, does the kiss we shared still haunt you now, tonight?

Does her dress feel warm between your hands my love, tonight?

Does she know the path of least resistance in your bed tonight?

Does she breathe that score of love now

Can she read between the lines

How must she feel to know your heart still lives in me

Does she know that she's your safe ride? Your safe ride...

Bridge:

And you turn off that little voice inside your head,

Your finger prints all over her will not wash away mine....

(violin)

(C major Guitar solo part)

Can't you see that your life could feel so real

That your heart was made to beat

That you were made only for me

But just go on and take a safe ride, a safe ride...
